

AutoTeks®

Metal Roof Fastening System

An Evolution in Roof Fastening - Increases efficiency - Decreases fatigue

AutoTeks®

A new innovation from Buildex® AutoTeks® is a complete system of both tool and fasteners designed for the easy fastening of metal roofing profiles.

The current way of roof fastening is an exhausting process, placing a strain on the roofers back. AutoTeks® is a new innovation from Buildex®, a complete system designed to substantially decrease fatigue and increase efficiency, eliminating OHS&E claims.

The upright drilling position promotes a more efficient, work practice, allowing roofers to work at the same speed, but for a substantially longer period.

Ensures correct washer height every time eliminating damaged seals and overdriving of screws.

Easy setup and use for "unskilled" labour.

Simple operation, a novice user can be up to full speed in minutes.

Accurate depth adjustment reduces dimpling under screw.

Buildex® AutoTeks® Fasteners are fed through this convenient loading chute.

Correct height adjustment first time everytime.
Purpose built foot recently modified, to suit both square-rib and corrugated roofing profiles.
Automatically centres screws on roof profile.

Better Drill Performance

Buildex[®] AutoTek[®] Fasteners use a new and improved drill point technology that delivers greatly improved drill performance, particularly in lapped purlins.

All AutoTek[®] Fasteners are easily recognisable by the "BX4" marking on the screw head.

Product Features

Buildex[®] Warranty

Climaseal[®] 4
(AS3566 Class 4)

ShankGuard[®]

HiGrip[®]

How To Use

1. Connect tool to power source.
2. Drop ONE screw* point down into funnel.
(Only one screw can be inserted at a time into the tube. Do not fill tube with screws.)
3. Push tool downward until it contacts the roof panel.
4. Engage trigger and continue to push tool downward until screw is fastened.

5. Depth Adjustment Adjustment is made using the large ring located on the upper tool assembly. Rotating the ring closer to the screwgun will make the screw seat tighter to the roof panel.

Buildex[®] AutoTek[®] Fasteners ONLY. Failure to use Buildex[®] fasteners will result in tool jamming and failure to install fasteners.

AutoTek[®] Tool

Description	Qty	Part Number
AutoTek [®] Tool Assembly	1	6-991-0366-7

M5.5 x 25mm Hex Head with Seal

For valley fixing roofing and cladding profiles to steel purlins.

Screw Gauge	T.P.I	Length	Pack / Carton Qty	Pallet Qty	Part Number	Product Features
5.5mm	14	25	500 / 4	144,000	6-310-3619-9C4	

M5.5 x 50mm Hex Head with Seal

For fastening square-rib roofing profiles to steel purlins up to 4.5mm thick. 50mm in length to accommodate thicker insulation blanket.

Screw Gauge	T.P.I	Length	Pack / Carton Qty	Pallet Qty	Part Number	Product Features
5.5mm	14	50	1000	84,000	6-310-3579-4C4	

Head painted colours on request minimum order quantity will apply.
